

89_

Next-gen sequencing – a disruptive technology to transform freedom-from-disease (FFD) surveillance

PA DURR, J ROBERTS

93_

Syndromic surveillance on phone calls about cattle health problems for early detection of emerging diseases

H BROUWER, A DE BONT-SMOLENAARS, L VAN WUIJCKHUISE, G VAN SCHAİK

97_

Drivers for the development of an animal health surveillance ontology (AHSO)

FC DÓREA, F VIAL, K HAMMAR, A LINDBERG, E BLOMQVIST, CW REVIE

101_

Is pig abattoir inspection data useful for surveillance purposes?

C CORREIA-GOMES, RP SMITH, JI EZE, GJ GUNN, MK HENRY, S WILLIAMSON, SC TONGUE

105_

Animal health surveillance constraints in North and South: same-same but different?

M PEYRE, HTT PHAM, C CALBA, K SCHULZ, A DELABOUGLISE, F GOUTARD, F ROGER, N ANTOINE-MOUSSIAUX

109_

Multispecies livestock rearing in developing countries – a challenge to collect, present and interpret surveillance data

TT ZAW WIN, A CAMPBELL, RJS MAGALHAES, KN OO, J HENNING

113_

HandiResponse: Software tools for designing optimal One Health surveillance portfolio for emerging zoonotic diseases

JS MCKENZIE, S WANG, RS MORRIS, EN NEUMANN, BD O'LEARY, M. SUJAU, RM CANNON

117_

Understanding drivers of how to improve producer-led passive surveillance among smallholder livestock producers in Australia

M HERNÁNDEZ-JOVER, L HAYES, R WOODGATE, L RAST, J-ALML TORIBIO

121_

Hands off my lifestyle? Knowledge, attitudes and practices related to biosecurity and animal health surveillance in New Zealand's smallholder sector

D VINK, J NEWITT, M VAN ANDEL, C RODWELL

125_

Stochastic scenario-tree modelling of the cost-effectiveness of bovine brucellosis surveillance in a disease-free country: implications for improving system efficiency

V HÉNAUX, D CALAVAS

129_

Estimation of the probability of freedom from infectious salmon anemia virus in farmed coho salmon in Chile using scenario tree modeling

FO MARDONES, A ALBA, R IBARRA, A TELLO, M LARA, K MONTECINOS, A GALLARDO, E SERGEANT, AM PEREZ

133_

Risk-based surveillance – a powerful alternative to conventional surveillance strategies? An evaluation study on the basis of classical swine fever in wild boar

K SCHULZ, M PEYRE, B SCHAUER, J SCHULZ, C CALBA, B HÄSLER, C STAUBACH, FJ CONRATHS

137_

Comparative assessment of the surveillance systems for equine infectious anaemia, equine viral arteritis and contagious equine metritis in France

JP AMAT, P HENDRIKX, J TAPPREST, A LEBLOND, B DUFOUR

141_

Valorisation of surveillance data and assessment of the sensitivity of a surveillance system for an equine infectious disease using a unilist capture-recapture model

JP AMAT, T VERGNE, A HANS, B FERRY, P HENDRIKX, J TAPPREST, B DUFOUR, A LEBLOND

145_

Canadian animal health surveillance network – the road to big data analysis

H KLOEZE, A TROKHYMCHUK, T BURNS, N DE WITH, G DUIZER, H AKWAR, S MUKHI

149_

Operational design and field implementation of a syndromic surveillance of cattle mortality: preliminary lessons from the OMAR pilot experience in France

C SALA, A BRONNER, S HOSTEING, F LALOY, J-B PERRIN, D CALAVAS, A TOURATIER

153_

Real-time syndromic surveillance in companion animals; integrating electronic health records to provide One Health messaging and feedback loops to practice

AD RADFORD, F SÁNCHEZ-VIZCAÍNO, S DAWSON, PH JONES, B HEAYNS, M DAY, S EVERITT, K MCCONNELL, DA SINGLETON, J TULLOCH, J NEWMAN, PJM NOBLE

157_

Which farmers to ask? Methods for identifying timely and reliable respondents for syndromic surveillance of farmers' observations

CN PFEIFFER, SM FIRESTONE, AJD CAMPBELL, JWA LARSEN, MA Stevenson

161_

Understanding antimicrobial resistance using a complex adaptive systems approach

EJ PARMLEY, SE MAJOWICZ, MT PHAM S TEA, N KHAN, C CARSON

165_

Metrics for measuring veterinary antimicrobial use data – a Canadian perspective

A BOSMAN, D LOEST, C CARSON, D LEGER

169_

Quantifying human exposure to antimicrobial resistance from animals and food

T HALD, AS RIBEIRO DUARTE, J PINTO FERREIRA, KD STÄRK

171_

Monitoring of antimicrobial use and the association with cattle health parameters in the Netherlands

H BROUWER, I SANTMAN-BERENDS, M GONGGRIJP, H HAGE, A DE BONT-SMOLENAARS, L VAN WUIJCKHUISE, G VAN SCHAİK

175_

Supply chain view to prevention and surveillance of antimicrobial residues in meat.

L ALBAN

179_

One Health surveillance and antimicrobial resistance: How does integration of animal and human components impact the effectiveness and economic efficiency of surveillance systems?

C AENISHAENSLIN, B HÄSLER, A RAVEL, J ZINSSTAG, J PARMLEY, D BUCKERIDGE

183_

Open web-based application to optimise sampling strategies for active surveillance activities at the herd level

A ALBA, RE MORRISON, AN CHEERAN, A ROVIRA, J ALVAREZ, AM PEREZ

187_

An analysis use patterns of antimicrobials and risk factors for their use on New Zealand farms

M BRYAN, E KNUPFER, S FRUEAN

191_

Changing the animal welfare culture: instigating an animal health and welfare programme for New Zealand farmers

M BRYAN, E KNUPFER, S FRUEAN

193_

Environmental health surveillance using a One Health approach

CHECKLEY SL, NEUMANN N, CAFFREY N, CEY E, CHUI L, CORK S, GOW S, HALL D, JAMAL I, LEE B, LOUIE M, MCCARROLL K, PANG X, POPADYNETZ J, REYNOLD C, RYAN C, VALEO C

195_

Monitoring cattle abortion telephone notification calls as a health indicator in Great Britain

C COOK, LA STRINGER, E WATSON

199_

A baseline for characterising risk: conditions found in indoor versus outdoor fattening pigs at traditional meat inspection

I MCCRONE, C CORREIA-GOMES, RO ABASCAL, AW TUCKER, D ARMSTRONG, GJ GUNN, SC TONGUE

203_

Strengthening a risk-based control strategy for foot-and-mouth disease in South East Asia through improved animal disease surveillance

I DACRE, WD VINK

205_

The importance of communicating surveillance information illustrated by the BVD type 2 outbreaks in the Netherlands

AJG DE BONT-SMOLENAARS, L VAN WUYCKHUISE, L VAN DUIJN, G VAN SCHAİK

209_

From disease surveillance to the official recognition of freedom from disease for trade purposes

M DOMINGUEZ, S FORCELLA, M PARK, M MORINI, I DACRE, L WEBER-VINTZEL

213_

Using a rubric to design and evaluate a passive surveillance system

L EARL, W ALLEN, A GRANT

217_

Investigation of mortality in bison under normal production settings, with a special emphasis on Malignant Catarrhal Fever

T EPP, C WALDNER, M WOODBURY, F UEHLINGER

221_

Retrospective analysis of 11 years of livestock necropsy data: evaluation for animal health surveillance.

C FAVERJON, S KÜKER, L FURRER, J BEREZOWSKI, H POSTHAUS, F RINALDI, F VIAL

225_

Analysis and dynamic visualisation of spatio-temporal network of bovine transit.

JOA GALVIS, NC CESPEDES, R OSSADA, PL LOPES, M AMAKU, F FERREIRA, JS FERREIRA NETO, JHH GRISI-FILHO

229_

Risk-based strategy to establish a trichinella negligible risk compartment

M BRANAN, L GUSTAFSON, M REMMENG, M ANTOGNOLI

231_

Using SQL and R to simplify the analysis and reporting of a multi-target, individual animal African horse sickness surveillance program in South Africa

GREWAR JD, WEYER CT, VAN HELDEN LS

235_

A framework for targeted allocation of resources for livestock disease surveillance in selected Pacific Island countries.

A BRIOUDES, B GUMMOW

237_

Risk based surveillance of influenza A virus in wild birds in Chile

C HAMILTON-WEST, S RUIZ, N BRAVO-VASQUEZ, P GALDAMES, S GONZALEZ, G BOLDT, P JIMENEZ BLUHM, S SCHULTZ-CHERRY

241_

Assessment of the value of post mortem surveillance of outdoor-reared finishing pigs with focus on bovine tuberculosis and "cost of error".

RK HANSEN, LH NIELSEN, M ELTHOLTH, B HÄSLER, L ALBAN

245_

An overview and comparison of surveillance methods to demonstrate freedom from classical swine fever

R HIBBARD, J DAVIS, S HAMILTON, SM FIRESTONE

249_

Evaluating the efficacy of regionalisation in limiting high-risk livestock trade movements

A HIDANO, TE CARPENTER, MA STEVENSON, MC GATES

253_

A new approach to monitoring animal health and biosecurity risk in Australia.

RM IGLESIAS, IJ EAST, L SHARP, A HILLMAN, MG GARNER

255_

An evaluation of Australian surveillance for freedom from bovine tuberculosis.

ESG SERGEANT J HAPPOLD, IG LANGSTAFF

257_

RISKSUR webtools: building surveillance capacity through training and application.

A LÉGER, F DOREA, B HÄSLER, M PEYRE, T SCHRAPPS, A LINDBERG, KDC STÄRK

261_

Epidemiological modelling of Bovine Johne's disease risk in Western Australia.
L LOTH

265_

Sheep disease surveillance on grain-sheep farms in Western Australia
R BUTLER, L LOTH

269_

Modelling the spread of emerging infectious diseases in animal health: case study of lumpy skin disease in the Balkans, 2015–2016

A MERCIER, E ARSEVSKA, J CAUCHARD, P CAUFOUR, S FALALA, A BRONNER, L BOURNEZ, F ETTORE, B PEIFFER, T LEFRANÇOIS, M GILBERT, C TISSEUIL, P HENDRIKX, D CALAVAS, R LANCELOT

273_

The role of community animal health workers in disease surveillance in African pastoralist communities: a review.
F MITIKU

277_

Social network analysis: an information tool for effecting targeted disease surveillance amongst rural poultry farms in eastern Zambia
C MUBAMBA, G RAMSAY, C ABOLNIK, G DAUTU, B GUMMOW

281_

Development of a user-friendly and analytically strong platform to support near real-time surveillance of food animal diseases
AG ARRUDA, P MUELLNER, U MUELLNER, C AHLSTROM, R MORRISON, A PEREZ

285_

Collaboration between a non-governmental organisation, scientists and policy makers in order to improve control of Glanders in Uttar Pradesh, India
S NIJJAR, AN SINGH, DS MOHITE

289_

Comparative human exposure to antimicrobial resistant bacteria from food animals using integrative assessment modelling: A farm to fork approach.
CP MURPHY, C CARSON, P SHARMA, J MARROTTE, M MCCANN, C PRIMEAU, B CHAPMAN, EJ PARMLEY

293_

Contribution of backyard poultry productive systems (BPS) to food security and their potential zoonotic risks
F DI PILLO-SANHUEZA, V NIETO, P GALDAMES, C HAMILTON-WEST

297_

Whole genome sequencing for determining the source of Mycobacterium bovis in livestock herds and wildlife in New Zealand.
M PRICE-CARTER, D COLLINS, G DE LISLE

301_

Network visualisation of UK companion animal pharmacosurveillance, with focus on systemic antibacterials
DASINGLETON, F SÁNCHEZ-VIZCAÍNO, S DAWSON, PH JONES, PJM NOBLE, G PINCHBECK, N WILLIAMS, AD RADFORD

305_

Usefulness of fallen stock data in describing quantitative equine mortality in France
J TAPPREST, E MORIGNAT, X DORNIER, M BOREY, P HENDRIKX, B FERRY, D CALAVAS, C SALA

309_

A proxy for ovine mortality: early warning, or is it a fluke?
SC TONGUE, JI EZE, CG GOMES, F BRULISAUER, GJ GUNN

313_

Surveillance in the sheep sector: views from the field
SC TONGUE, EA MARIER, T FLOYD, AJ COOK, J RUSHTON, GJ GUNN

317_

Surveillance to investigate the epidemiology of potentially zoonotic hepatitis E in commercial pig herds supplying Cape Town, South Africa.
LS VAN HELDEN, S KORSMAN, JD GREWAR, P THOMPSON, S ISAACS, K PICOZZI, M ANDERSSON, W PREISER

321_

Changing surveillance objectives during the different phases of an emerging disease outbreak: the Schmallenberg virus example
A VELDHUIS, A STEGEMAN, J MARS, G VAN SCHAİK

325_

Voluntary sentinel surveillance: building a longitudinal disease surveillance network with cow-calf herd owners in Western Canada
S PARKER, CL WALDNER, M JELINSKI, JR CAMPBELL

329_

Health and welfare surveillance in farm animals – using existing register data from public and private partners
A WENDT, F NIENHAUS, T KORNIHOFF, G KLEIN, T BLAHA, K KNÖLL, T MAY, D MEEMKEN, L KREIENBROCK

333_

Monitoring farm and cow level prevalence of bovine digital dermatitis in New Zealand
D YANG, R LAVEN, KR MUELLER, WD VINK, RN CHESTERTON

337_

Seroepidemiological study to identify the risk factors for Porcine Reproductive and Respiratory Syndrome (PRRS) in Myanmar
TT ZAW WIN, KN OO
